

MAY 12TH – 15TH, 2026
HOSTED VIRTUALLY

Where Operational Resilience Takes Center Stage

Join leaders across emergency management, healthcare, defense, public safety, and critical infrastructure for five immersive days of learning, collaboration, and innovation. Juvare Elevate 2026 brings together our global user community to explore what's new, what's next, and what's working across platforms, sectors, and real-world response. From hands-on training to strategic main stage sessions, Elevate 2026 is built to help you advance your mission and elevate the impact of your work.

04:00 PM-05:00 PM

JUVARE AWARDS

A celebration dedicated to honoring organizations and individuals who exemplify operational resilience, innovation, and leadership across the Juvare community.

Join us as we spotlight those making extraordinary impacts, whether through groundbreaking use of Juvare solutions, community collaboration, or transformative incident response.

Subject to change.

Check the Elevate event portal regularly for the latest session lineup, session descriptions, and the ability to personalize your schedule.

DAYS 03 & 04

10:00 AM-05:00 PM

THURSDAY, MAY 14TH & FRIDAY, MAY 15TH, **HANDS-ON TRAINING**

The final two days of Juvare Elevate are dedicated to in-depth, role-based training designed to equip you with applicable skills, certifiable knowledge, and real-world scenarios you can bring back to your organization.

These training courses may have fees associated and will require registration for each session via the event registration page.

DAY 03

10:00 AM – 5:00 PM
(W/ 1HR LUNCH BREAK)

THURSDAY, MAY 14TH

CRISIS TRACK ESSENTIALS

This all-in-one training includes modules for administrators, EOC operators, and field users. Learn to configure Crisis Track, manage incident operations, and perform accurate field assessments – even without cellular connectivity.

10:00 AM – 1:00 PM

EMRESOURCE ADMIN

This Administrator course will cover the basics of EMResource administration, including user and resource management, views and dashboards, status type management and events. New administrators will leave this course with a base understanding of EMResource use and daily administration.

01:00 PM – 4:00 PM

JUVARE AI (JAI) & JUVARE EXCHANGE (JX) WORKSHOP (NO COST)

This integrated workshop introduces participants to two powerful tools: Juvare AI (JAI) and Juvare Exchange (JX). Attendees will learn about AI-powered data retrieval, visualization, and analysis capabilities with JAI, as well as how to design and configure a network from the ground up to exchange information seamlessly between agencies and jurisdictions with JX.

01:00 PM – 5:00 PM

EICS TRAIN-THE-TRAINER: DEVELOPING YOUR OWN PROGRAM

Designed for senior-level emergency managers, health system emergency managers, and Department of Health leaders, this training delivers essential “train-the-trainer” expertise, enabling attendees to confidently develop their own training programs and maximize eICS capabilities. Participants will learn how to train their teams to create ICS charts, configure Incident Response Guides (IRG), and manage incidents from start to finish. You will also learn about using the new opt-in features.

DAY 04

10:00 AM – 5:00 PM
(W/ 1HR LUNCH BREAK)

FRIDAY, MAY 15TH

EDGE (EMERGENCY DECISION & GOVERNANCE EXERCISE)

This scenario-based training puts your WebEOC skills to the test in a real-time emergency simulation. You'll practice communication, coordination, and data-driven response across multiple functional areas in a fast-paced, hands-on environment.

10:00 AM – 1:00 PM

EMTRACK ADMIN

This administrator course will provide the new EMTrack Administrator with the tools and confidence to manage and maintain EMTrack on a daily basis. This will cover user and agency management, tracking workflows and form customization. This course will end with a tabletop use case and train the trainer tips for end user training.

01:00 PM – 4:00 PM

EMSUITE: COORDINATED RESPONSE USING THE FULL EMSUITE

In this session, we will use real world scenarios to show how the products can be used together to manage complex incidents and events. We will answer the age-old question of which app should be used for which task and some basic best practices to ease the chaos that occurs when the “big one” comes.
